CONTENTS

Contents, special issue vii
Preface ix

General review papers
Geochronology of early to middle Proterozoic fold belts in northern Australia: a review
R.W. Page (Canberra, A.C.T., Australia) 1
Age of the Barramundi Orogeny in northern Australia by means of ion microprobe and conventional U–Pb zircon studies
R.W. Page and I.S. Williams (Canberra, A.C.T., Australia) 21
Petrology, geochemistry and origin of a major Australian 1880–1840 Ma felsic volcano-plutonic suite: a model for intracontinental felsic magma generation
L.A.I. Wyborn (Canberra, A.C.T., Australia) 37
Australian Precambrian polar wander: a review
M. Idnurm and J.W. Giddings (Canberra, A.C.T., Australia) 61
Development of the Australian Proterozoic crust as inferred from gravity and magnetic anomalies
P. Wellman (Canberra, A.C.T., Australia) 89
A review of crust/upper mantle structure in the Precambrian areas of Australia and implications for Precambrian crustal evolution
B.J. Drummond (Canberra, A.C.T., Australia) 101

Albany–Fraser Belt
A structural and metamorphic traverse across the Albany Mobile Belt, Western Australia
J. Beeson, C.P. Delor and L.B. Harris (Nedlands, W.A., Australia) 117

Antarctica
Structural constraints on the Proterozoic reworking of Archaean crust in the Rayner Complex, MacRobertson and Kemp Land coast, East Antarctica
G.L. Clarke (Parkville, Vic., Australia) 137

Arunta Inlier
South Arunta Block: the internal zones of a Proterozoic overthrust in central Australia
C. Teyssier (Minneapolis, MN, U.S.A.), C. Amri (Clayton, Vic., Australia) and B.E. Hobbs (Mt. Waverley, Vic., Australia) 157
Isobaric cooling of Proterozoic high-temperature metamorphites in the northern Arunta Block, central Australia: implications for tectonic evolution
R.G. Warren and A.J. Stewart (Canberra, A.C.T., Australia) 175
'Caterpillar tectonics' in the Harts Range area: a kinship between two sequential Proterozoic extension–collision orogenic belts within the eastern Arunta Inlier of central Australia
P.R. James and P. Ding (Adelaide, S.A., Australia) 199
Rate of Arunta Inlier evolution at the eastern margin of the Entia Dome, central Australia
J.A. Cooper, G.E. Mortimer and P.R. James (Adelaide, S.A., Australia) 217
The petrology and geochemistry of granitic gneisses from the East Arunta Inlier, central Australia: implications for Proterozoic crustal development
J.D. Foden, I.S. Buick and G.E. Mortimer (Adelaide, S.A., Australia) 233
Geochemistry of metatholeiites from the Harts Range, central Australia: implications for mantle source heterogeneity in a Proterozoic mobile belt
W.J. Sivell (Sydney, N.S.W., Australia) 261

Metamorphism and crustal considerations in the Harts Range and neighbouring regions, Arunta Inlier, central Australia
R.L. Oliver, R.W. Lawrence, P. Ding, D.G. Bowyer (Adelaide, S.A., Australia) B.D. Goscombe (Melbourne, Vic., Australia) and W.J. Sivell (Sydney, N.S.W., Australia) 277

Broken Hill Block
The Willyama Supergroup in the Broken Hill and Euriowie Blocks, New South Wales
B.P.J. Stevens (Broken Hill, N.S.W., Australia), R.G. Barnes, R.E. Brown, W.J. Stroud and I.L. Willis (Armidale, N.S.W., Australia) 297

Davenport Province
The Proterozoic Davenport province, central Australia: regional geology and geochronology
D.H. Blake and R.W. Page (Canberra, A.C.T., Australia) 329

Gascoyne Province
The nature of Proterozoic reworking of early Archaean gneisses, Mukalo Creek Area, Southern Gascoyne Province, Western Australia
J.R. Muhling (Nedlands, W.A., Australia) 341

Gawler Craton
Refined Proterozoic evolution of the Gawler Craton, South Australia, through U–Pb zircon geochronology
C.M. Fanning, R.B. Flint, A.J. Parker, A.H. Blissett (Adelaide, S.A., Australia) and K.R. Ludwig (Denver, CO, U.S.A.) 363
The geochemical evolution of Proterozoic granitoids near Port Lincoln in the Gawler orogenic domain of South Australia
G.E. Mortimer, J.A. Cooper and R.L. Oliver (Adelaide, S.A., Australia) 387
Petrogenesis of the Proterozoic Gawler Range Volcanics, South Australia
C.W. Giles (Mount Pleasant, S.A., Australia) 407

Georgetown Inlier
Proterozoic stratigraphy and tectonic history of the Georgetown Inlier, northeastern Queensland
I.W. Withnall, J.J. Draper (Brisbane, Qld., Australia), J.H.C. Bain, D.E. MacKenzie and B.S. Oversby (Canberra, A.C.T., Australia) 429

Halls Creek Orogenic Domain
Geochronology of a rapid 1.85–1.86 Ga tectonic transition: Halls Creek orogen, northern Australia
R.W. Page (Canberra, A.C.T., Australia) and S.L. Hancock (Townsville, Qld., Australia) 447
Geochemistry of the Early Proterozoic granitoids in the Halls Creek Orogenic Subprovince, northern Australia
M. Ogasawara (Tsukuba, Japan) 469

Mount Isa Inlier
The Maronan Supergroup: an inferred early volcanosedimentary rift sequence in the Mount Isa Inlier, and its implications for ensialic rifting in the Middle Proterozoic of northwest Queensland
T.J. Beardsmore, S.P. Newbery and W.P. Laing (Townsville, Qld., Australia) 487
Petrology, geochronology and isotope geochemistry of the post-1820 Ma granites of the Mount Isa Inlier: mechanisms for the generation of Proterozoic anorogenic granites
L.A.I. Wyborn, R.W. Page and M.T. McCulloch (Canberra, A.C.T., Australia) 509

Pine Creek Inlier and Litchfield Province
Tectonic evolutioln of the Pine Creek Inlier, Northern Territory
R.S. Needham, P.G. Stuart-Smith and R.W. Page (Canberra, A.C.T., Australia) 543
The stratigraphy, metamorphism and tectonics of the Early Proterozoic Litchfield Province and western Pine Creek Geosyncline, Northern Territory
B.A. Pietsch and C.J. Edgoose (Darwin, N.T., Australia) 565
